PRINTNET SOLUTIONS

WEB TO PRINT

PrintNet Solutions

» Software Information

PrintNet is a state-of-the-art, 100% cloud-based Web-to-Print submission software which completely automates the electronic print job submission process.

PrintNet also centralizes incoming job orders by providing an organized and efficient dashboard, making it easy for the print center staff to manage their incoming print orders.

PrintNet provides an unlimited number of user-friendly storefronts, making it simple for anyone to pull files into the system, add instructions on how they want their job run, and submit their print order quickly and efficiently – for a timely and perfectly run print order every time.

» Company Information

Their team is made up of some of the brightest and most creative programmers in the industry, and while PrintNet provides a web-to print solution for corporate businesses that have an In-Plant Print Center or CRD, PrintNet does recognize the special needs of verticals and has added customization for vertical markets such as Education, Hospitals and Health Care, Government Centers, Real Estate, and Law Firms.

» Customer Benefits

- Unlimited user-friendly web to print submission storefronts provided
- Organized and efficient dashboard provided to print center manager and staff to help them easily manage the print center's incoming print orders
- PrintNet converts 340 file types to a ready to run PDF eliminating the need for conversion software
- PrintNet is 100% cloud-based so no installation on servers behind the firewall is required making implementation and training quick and easy
- Complete forms manager with connectivity to share point available
- Variable data design tool for easy marketing collateral creation and brand control

» Competitive Positioning

PrintNet is suitable for any corporate business with an in-plant print center or CRD. It also has a flexible pricing model, making it an affordable option with a low cost of entry – without sacrificing power and efficiency.

In addition, PrintNet has the ability to be very nimble in the software development approach to the rapidly changing dynamics and requirements of the printing industry.

Key Features and Benefits
Provides print center with a user-friendly dashboard to easily receive print orders - eliminating emails, FTP, walk-ins, thumb drives or other typical job submissions
Several connection points available such as SSO, LDAP, Fiery, SciQuest, Heartland and Authorize.Net
Create marketing collateral from scratch or one of the thousands of pre designed templates while controlling branding
Layered pricing and reporting system that allows print center staff to fully automate invoicing, chargebacks and reporting
Force the print job submitter to answer all of the simple questions such as color or black and white, single or double sided, bindery, etc.
Conveniently order print jobs from any computer, laptop, tablet or smartphone
