

A new world of possibilities

Trusted technology re-imagined.

TASKalfa Pro Family Brochure

A proven Market-Leader

To be the best, you need to work with the best.

Kyocera has a legacy in creating world-leading ceramics. Using this expertise, we create our inkjet printheads. This technology has been trusted by OEMs for decades to power their commercial printers. Despite the abundance of production inkjet printers, for most businesses, this technology was inaccessible. That's why we launched our first inkjet device into the market in 2019, building technology that solves real problems for print service providers. Our proven technology performs in production environments where uptime, consistency, and cost per page are a must.

Our mission is to make Inkjet For All, striving to help printers of all types grow their business, achieve their goals today, and transform what's possible tomorrow.

The TASKalfa Pro Family is the market leading choice for businesses looking to: get into the production print market is ideal for businesses looking to: get into the production market, add a side-car device to their operation, or replace multiple offset devices. It's highly reliable, offers affordable color, and allows businesses to say yes more.

We don't just offer unmatched reliability and outstanding TCO. We have a range of feed and finishing options that allow businesses to do more reducing pressures on manual labor and boosting productivity.

Discover what we can do for your business before your competitors do.

The Kyocera Production Family

Our Journey as Market Leaders

What the industry says about us

Yet, don't just take our word for it; the industry knows the power of our technology.

Rich Armstrong, President

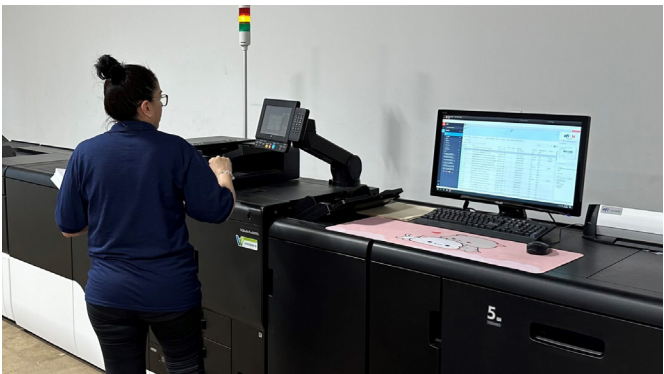

Snowman Group

“It's a real game changer in the statement-printing business. It's one of those machines that ... does what it says it can do, which is rare.”

Luke Austin, CEO and Vice President

VariVerge

“It was clear from the beginning that to print color or black and white on the Kyocera you're spending a tenth of a cent and on the toner boxes you were spending five-tenths of a cent, so for me the cost analysis stops at that point.”

Ivy Johnson, Owner

Johnson Advertising

“It's been a great little unit. We run this thing constantly. We're doing millions and millions of impressions on it a month now. And it doesn't blink. They print like butter, and we move on to the next job.”

Donna Enriquez, Print Services Supervisor

The Fontana Unified School District

“I feel like the inkjet press is so perfect for education.”

Discover a device that's got the industry talking

The TASKalfa Pro family of Inkjet Presses offers the most affordable entry point into cut-sheet production inkjet in the market. Color on the TASKalfa Pro 15000c costs a fraction of what toner-based systems charge, this is a game-changer, opening revenue streams that were previously out of reach.

Affordability means nothing without reliability. TASKalfa Pro 15000c delivers 97% uptime providing more revenue potential and less headaches.

This press is a workhorse. It can handle up to 3 million images per month... every month, maintaining output quality across long runs without compromise.

And this repeated, consistent quality is also achieved at lightning speeds. At up to 172 images per minute with no slowdown for duplex, and with front-to-back registration held tight across every job type, the The TASKalfa Pro 15000c handles your critical customer communications effortlessly whether it's direct mail, education, publishing, in-plant, or transactional.

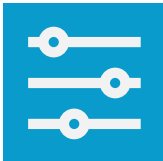

97% uptime

Duty cycle up to 3 million images

Up to 172 images per minute

Customizable feed and finishing options

Leading technology in black and white

The TASKalfa Pro 15000b delivers a total cost of ownership that makes production more profitable.

Designed with Kyocera's industry-leading printheads, it delivers high-quality monochrome output built on the legacy of our market-leading TASKalfa Pro 15000c. It has a cost per page that toner simply cannot match at volume. For operations already running high-volume black-and-white work, the ROI is fast.

But cost per page only tells part of the story. The TASKalfa Pro 15000b is built for the demands of continuous production environments, maintaining consistent output quality across long runs without compromise. It handles the workload that monochrome production demands day in, day out, with 97% uptime and a 3 million-image per month duty cycle to back it up.

Uptime and costs are combined with lightning speed. Designed to keep pace with the most demanding printing environments, it handles direct mail, education, in-plant, publishing, and transactional work with ease at up to 172 ipm.

Say hello to trusted technology, re-imagined.

Configuration Patterns

A possibility for every business goal.

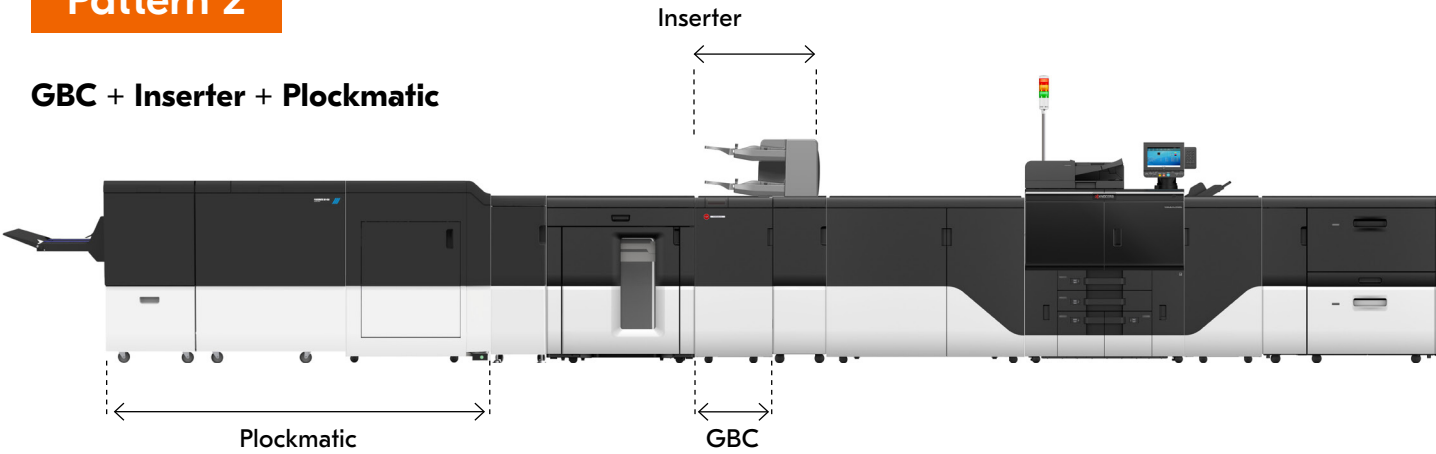

Pattern 1

GBC + TECNAU Roll to Cut

Pattern 2

GBC + Inserter + Plockmatic

Pattern 3

GBC + Inserter + Plockmatic + TECNAU

Plockmatic Booklet Maker with Rotate, Crease, and Trim

Turning booklet production into a streamlined workflow.

Demand for short-run and on-demand booklets continues to grow across education, corporate, and commercial print markets. Often, booklet making requires manual steps that slow production and impact consistency, not anymore.

The Plockmatic Booklet Maker with Rotate, Crease, and Trim brings high-speed, precision booklet finishing inline with the TASKalfa Pro inkjet production printers. By automating rotation, creasing, and trimming, this solution produces professional-quality booklets, square bound, and up to 200 pages.

Now, with Kyocera and Plockmatic, PSPs can confidently offer booklet applications as a standard service, improving turnaround times while maintaining quality and repeatability across runs.

Why it's perfect to partner with the TASKalfa Pro inkjet production printers.

- Reduce labor and outsourcing
- Consistent quality
- Offer new applications

IS-9100 Cover Inserter

Adding value through automated cover handling.

Finished documents with pre-printed or specialty covers stand out from the crowd and remain a high-value offering. But manually inserting covers can interrupt production and increase labor requirements.

The IS-9100 Cover Inserter paired with the MD-9100 Multi-Feed Detection Unit automates the insertion of pre-printed glossy covers or inserts directly into the production workflow. Designed to operate smoothly within mixed-job environments, it enables PSPs to enhance output without slowing throughput.

By improving labor efficiency and reducing manual handling, the IS-9100 and MD-9100 helps print providers deliver more complex output while maintaining production momentum.

Why it's perfect to partner with the TASKalfa Pro inkjet production printers.

- Automate cover insertion
- Reduce manual labor
- Enable value-added work

GBC PUNCHalfa Plus

Expanding binding capabilities with precision and consistency.

Binding options play a critical role in many vertical markets, and the GBC PUNCHalfa Plus expands the TASKalfa Pro inkjet production printers' finishing capabilities with professional punching, perfining, and creasing to expand your offerings.

Integrated directly into the production workflow, PUNCHalfa Plus ensures consistent hole placement and reduces the need for offline processing.

With flexible punching options available inline, PSPs can confidently take on a broader range of bound applications while maintaining quality and efficiency.

Why it's perfect to partner with the TASKalfa Pro inkjet production printers.

- Multiple binding formats
- Professional-grade punching
- Seamless workflow enhancement

TECNAU SheetFeeder KT

Extending productivity for high-volume environments.

High-volume applications such as transactional and direct mail demand consistency, uptime, and long uninterrupted runs.

The TECNAU SheetFeeder KT enhances the TASKalfa Pro inkjet production printers by bringing roll feed productivity with optional perfining and punch to save costs in your production environment.

This integration maximizes press productivity while reducing manual reloading and operator intervention. The result is smoother production, higher throughput, and more predictable output, particularly in environments where volume and efficiency matter most.

By pairing roll-fed efficiency with the flexibility of cut-sheet inkjet, the TECNAU SheetFeeder KT helps PSPs scale output without changing their production model, supporting growth while maintaining operational simplicity.

Why it's perfect to partner with the TASKalfa Pro inkjet production printers.

- More productive printing and operations.
- Up to 20% lower paper costs.
- More applications to be run cost-effectively in-line.

Kyocera Document Solutions has championed innovative technology since 1934. We enable our customers to turn information into knowledge, excel at learning and surpass others. With professional expertise and a culture of empathetic partnership, we help organizations put knowledge to work to drive change.
